ENGINEERING

Architecture · System design · Performance · Testing · State management · API design (GraphQL, REST, RPC, MCP)

STACK

TypeScript · JavaScript · React · Next.js · Vue · Nuxt · Node · Jest · Playwright · Three.js · WebGL · GSAP · HTML · CSS · SVG · Canvas

DESIGN & AI

Design systems · Motion & interaction · UX/UI · AI-native interfaces · Figma · Photoshop · Illustrator

EXPERIENCE

Miro, Senior Software Engineer

2023 — **Present** · Berlin

Across the **AI Innovation Workspace** I worked on **AI board content generation** and the new **AI First Dashboard** — where teams find, organise and start their work.

I built the **caching** and **state** layer used by the dashboard and sidebar — keeps data correct across browser tabs, cuts redundant requests, and keeps the experience fast and consistent. Also adopted by multiple teams in Miro.

I drove a **board-loading performance** initiative (Miro's most critical flow) — made it up to 40% faster on some flows through a strategy layer that decides how each board loads, from which endpoints and which data we reuse from one board to the next during in-app navigation.

I built a **client integration testing library** used now by multiple teams for near-end-to-end tests, with no servers or databases to spin up.

King (Activision Blizzard), Senior Frontend Engineer

2022 — 2023 · Barcelona

On, Senior Frontend Engineer

2020 — 2022 · Berlin / Zürich

fromAtoB, Senior Frontend Engineer

2019 — 2020 · Berlin

BizCommerce, Co-founder & Frontend Lead

2011 — 2019 · Brazil

JOE, Co-founder & Frontend Lead
